

Parking

In general, you should park in the parking spaces closest to our entrance and approaching the north-west corner of our building. It is important that we leave the physicians enough places to park near the rear entrance, and our patients a place to park near our front entrance. ****For patient safety, you must remember to save the MD on-call a space as we approach 5 pm. (If you are coming to night clinic, don't take one of the last two spaces closest to the rear entrance as this is reserved for the MD on call and another MD who may be assisting in Night Clinic.) On weekends this should not be an issue.

The spaces next to the building that are not reserved for patients or doctors are available on a first come first serve basis for the staff. They are not reserved for any particular department.
